PROJECTS

Statsy

(personal project) • 08/2023 - 10/2023

Full stack web app for tracking and keeping score in a social gaming environment.

Meal Plan app

Pensano Developers • 07/2023

Web app that generates 7-day meal plans for Nutritional Therapy students and practitioners based on dietary requirements, integrating the OpenAI API

Borrow My Garden

(group project) • 04/2023 - 05/2023

A platform community project allowing unused garden spaces to be listed by their owners, tackling the allotment shortage in cities.

WORK EXPERIENCE

Volunteer software developer

Pensano developers • 07/2023 - Present

- Collaborating with a team of developers, following Agile methodologies and utilizing source control tools, to deliver high-quality software solutions.
- Translating design specifications into functional and responsive React components, ensuring seamless user experiences.
- Leveraging UI libraries tailored to each project's needs and enhanced elements using CSS, resulting in visually appealing and intuitive interfaces

Web designer

Nomad Immigration • 01/2021 - 01/2022

- Developed and launched a professional website using a website constructor, incorporating knowledge of color theory, font combinations, and user journey.
- Created a visually captivating logo and impactful copy to enhance branding efforts.
- Streamlined domain and hosting options, resulting in cost savings by transitioning from a paid platform to independent hosting.

Paralegal

Michelmores LLP, Kadmos Consultants • 07/2018 - 12/2021

- Reviewed a substantial volume of documents for high-stakes legal disputes, honing attention to detail and analysis skills.
- Acted as the primary point of contact for clients, liaising with them to provide updates on application progress, document requirements, and other related matters. Conducted client interviews, taking statements, and gathering necessary information to support legal proceedings
- Collaborated effectively with multi-national teams, both locally and internationally, ensuring clear and efficient communication within the teams
- Successfully implemented new Client Relationship Management (CRM) software to streamline workflow and enhance record-keeping efficiency. Led the migration of multiple databases into a new system, optimizing data presentation and storage for enhanced productivity and accessibility
- Utilized MS Excel and practice management software to process legal data, producing accurate reports and documentation for clients and internal requirements. Maintained and updated legal case management systems for data accuracy, compliance, and reporting.

EDUCATION

Course in Full stack development

Makers Academy • 01/2023 - 05/2023

16-week intensive bootcamp:

- Gained proficiency in full-stack development.
- Developed the ability to rapidly learn new programming languages and transfer knowledge between languages.
- Acquired expertise in Test-Driven Development (TDD) and the complete design process, encompassing database design, wireframing, and routing.
- Embraced Agile methodology through practical experience, including daily pair programming, regular stand-up meetings, and participation in group projects to replicate real-world tech team dynamics.

Masters in Law

Bpp University • 06/2018

CERTIFICATIONS

Python
